

TAGIT

Co-Creating the City, One
Wall at a Time

Team Deco May Cry

Chen Li – Project Leader and User
Research
Shino Peng – Front-end Design
Yuhang Wu – Front-end Development
Hok Leung Lee – Back-end Logic and
Data Processing
Haoran Liang – Documentation and
Presentation

Urban walls are silent.
City spaces rarely let
people share their
thoughts creatively.
TagIt! responds to this
by turning ordinary
walls into public
canvases for digital
co-creation —
transforming passive
spaces into shared
conversations.

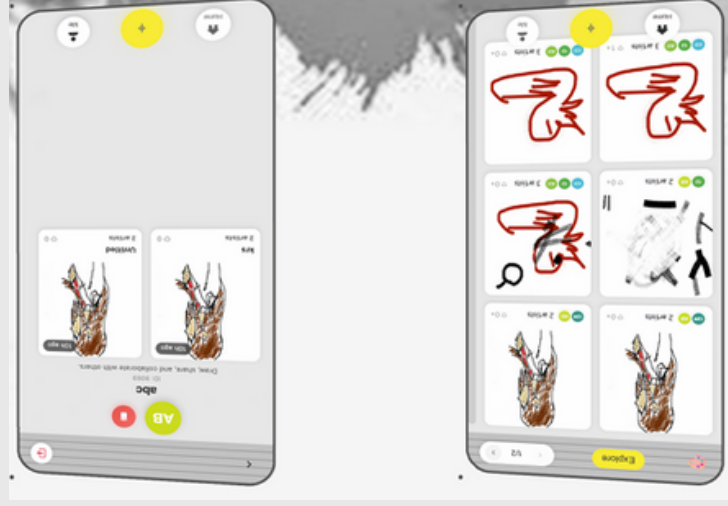

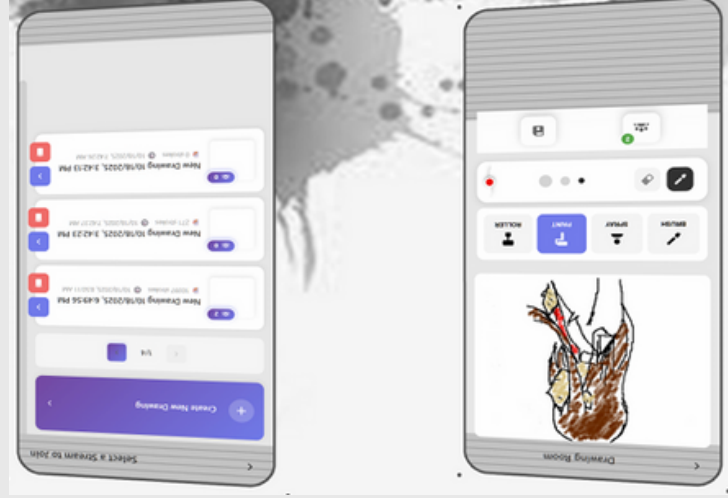

TagIt! lets anyone draw,
comment, or react in
real-time.

Every mark adds a new
layer to a living artwork,
visible to everyone
nearby. Through a digital
wall display and mobile
app, people can join,
collaborate, and see
their collective story
grow — no barriers, just
expression.

Thank you for
visiting our project

join the wall.

Tagiti – Make your mark.
Leave your story.

- Co-creating the city,
one wall at a time.
- Situated
collaboration:
Creativity happens
on the move, in real
locations.
- Shared authorship:
Every passer-by
becomes a co-
creator, not an
audience.
- Digital presence: It
merges the virtual
layer with the
physical cityscape.
